

MP-60.-3-I

Mixed insulated ladder 3 sections with rope and pulley

Description :

Application :

- Mixed insulated ladders 3 sliding sections with rope and pulley.
- For work on electrical installations with a maximum voltage of 1000 V AC - 1500 V DC.

Features :

- Complies with NF EN 50528. Tested 30 kV / 1 minute.
- Max. working load : 150 daN.
- Insulating top surface. Aluminium lower planes.
- Composite insulating slides of rectangular section and orange colour.
- Non-slip grooved aluminium rungs. Distance between rungs: 280 mm.
- Interchangeable upright end pads.
- Equipped with 2 front wheels with a diameter of 100 mm.
